

OX Strong Green Solution: R-values and Tight Seal = Energy Efficiency and Comfort

STRONG on Energy Efficiency & Comfort:

- **Air Barrier:** Industry's tightest air barrier for lower air infiltration with air change per hour performance 15-20% better than standard OSB + House Wrap. Tight air barrier means less drafty, healthier and air-tight homes.
- **Reducing Conductive Heat Losses and addressing Thermal Bridging** through framing means lower energy bills.
- **Reduce Condensation potential** within wall cavity means dry walls and less mold concerns
